

Statistics on the Time Frame of the Flood

Genesis 6:8-22

One month = 30 days

Total time elapsed in the ark - 1 year, 17 days =

360 days + 17 = 377 days

$$\begin{array}{ccccccc} 7 \text{ days waiting} & + & \frac{150 \text{ days}}{\text{Water Prevaiing}} & + & \frac{150 \text{ days}}{\text{Water Receding}} & + & \frac{70 \text{ days}}{\text{Earth Drying}} = 377 \text{ days} \end{array}$$
